

L-PVDOMICS STUDY

Center Blood Collection – Drawing Samples Form #800

Instructions: Biorepository specimens are collected for **L-PVDOMICS Level 1 participants only**. L-PVDOMICS Study Team member collecting blood should be familiar with MOP Chapter 233. The study coordinator will provide the study participant identification number and alpha code. If blood collection will never be done, explain why in Q5 and comments.

IMPORTANT NOTE: As of 03/28/2020, all participants newly enrolled (after March 16, 2020) in Level 1 and blood specimens are collected, will be asked if he/she has had a 'febrile' episode **within two weeks PRIOR** to L1 blood collection. A 'febrile' episode is defined as a temperature greater than 100.4° F.

A follow-up call to the participant will be completed to identify whether or not the participant had a 'febrile' episode **within two weeks AFTER** the L1 blood was collected.

--	--	--	--	--	--

1. Identification Number

--	--

2. Alphacode

--	--	--	--	--	--	--	--

3. Date of blood collection (mm/dd/yyyy)

4. Biorepository Kit Number LPVD

5. a. Status of Blood Collection

1=Done, continue with Q5c

2=Not done – attempted, but unsuccessful, briefly explain what happened in comments below, complete 5b.

3=Not done, site logistical issues, briefly explain what happened in comments below, complete 5b.

If 5a=2 or 3, complete **5b**: reason not done:

If Q5a='1-Done' and blood collected, participant **must** answer the following question:

c. Did L1 participant have a COVID19 test performed?

0=No, COVID19 test was not performed

1=Test performed, result was negative

2=Test performed, result was positive

3=Test performed, result unknown at this time (coordinator will need to follow-up to obtain final result)

d. If done, date of COVID19 test (mm/dd/yyyy)/...../.....
(This date is for when participant was tested, not date of results)

e. Did participant experience a febrile episode (temperature greater than 100.4° F)

2 weeks **PRIOR** to OMICS of this L1 OMICS blood collection?

0=No, participant reports no known 'fever' two weeks **PRIOR** to blood collection1=Yes, temperature was taken and was greater than 100.4° F 2 weeks **PRIOR** to blood collection

2=Participant thinks they may have had a 'fever' (temperature greater than 100.4° F) but doesn't know for certain.

3=Unknown, participant has no recollection if fever within 2 weeks **PRIOR** to blood collection; unable to provide an answer.

6. Username of person drawing blood _____
7. a. Did participant fast before this blood draw? (0=No, 1=Yes) _____
Note: Only water is OK
 b. If yes, number of hour(s) participant fasted? (round to the nearest half hour)..... _____. ____
8. How long did participant rest prior to blood draw (minutes)..... ____
9. Which arm was used for blood collection? (1=Right, 2=Left, 3=Other access)..... ____
10. If Q. 9=1 or 2, how many attempts did it take? ____
11. Were all Vacutainer™ blood tubes collected in the order stated in MOP Chapter 233? (0=No, 1=Yes) ____

Type of Tube(s)	12. Was this blood tube collected (0=No, 1=Yes)	13. Collection Time (24-hr clock) (hh:mm)
a. Gold Top SST 5 ml	_____	_____ : _____
b. Gold Top SST 5 ml	_____	_____ : _____
c. Lavender Top EDTA Plasma 10 ml	_____	_____ : _____
d. Red Top PAXgene®R NA Preservative solution 2.5ml	_____	_____ : _____

14. Time tubes were delivered to lab (24-hr clock) (hh:mm) ____ : ____
15. Were any issues experienced during the blood draw? (0=No, 1=Yes)..... ____

Comments:

200. Date form completed (mm/dd/yyyy) ____/____/____
201. Username of person completing/reviewing completeness of this form ____

Clinical Center Use Only

Date form entered (mm/dd/yyyy) ____/____/____

Username of person entering this form ____

03/28/2020: DCC notes: Retrospective Review Response codes: 4=No, participant reports no known 'fever' within two weeks (+/- 2 weeks) of OMICS blood collection; 5=Yes, temperature was taken and greater than 100.4 F within two weeks (+/- 2 weeks) of OMICS blood collection; 6=Yes, participant thinks they may have had a 'fever' (temperature greater than 100.4° F) but they don't know for certain. 7=Participant has no recollection of health status during that time period ; unable to provide answer. 9=Unknown, unable to contact participant. 03/30/2020: Q5a=1, then must complete COVID19 questions in Q5c-e.
